FROM THE DESK OF DR. WEINER

Why Spring Is the Perfect Time for a Dental Reset

Every year, spring prompts us to refresh our homes, our wardrobes, and our routines. At Envy Smile Dental Spa, we want to encourage you to extend that energy to one of the most visible and impactful parts of your health: your smile.

The start of spring is one of the most natural times to schedule a cleaning and checkup. Here is why that timing works in your favor:

- Winter diets tend to be higher in sugars and acidic foods – giving plaque more opportunity to build up. A professional cleaning removes what daily brushing cannot.
- If you have dental benefits that reset in January, you likely have a full year of coverage ahead. Using it early means you are not scrambling at year-end.
- Spring events – graduations, weddings, outdoor photos – are just around the corner. Your smile will be ready.

"A dental cleaning is not just about clean teeth: it is a full assessment of your oral health. Early detection changes outcomes."
– Dr. Marianna Weiner, Envy Smile Dental Spa

SPRING WELLNESS FOCUS

What Happens During a Professional Cleaning?

Many patients are surprised by how much happens in a single hygiene appointment. This is what your visit includes:

- Plaque and tartar removal from areas that daily brushing and flossing cannot reach – including below the gumline where inflammation begins.
- Polishing to remove surface stains from coffee, tea, wine, and food pigments.
- Full periodontal assessment: measuring pocket depths to catch early signs of gum disease before it becomes a larger problem.
- Oral cancer screening as a standard part of every comprehensive exam.
- Personalized recommendations from Dr. Weiner based on what she observes at your visit.

Most patients need a cleaning every six months. If it has been longer than that for you, now is the best time to get back on track – no judgment, just care.

TIP OF THE MONTH

The Two-Minute Rule, And Why Most People Get It Wrong

The recommendation to brush for two minutes twice daily is well-known. What is less known is that the technique matters just as much as the time.

Three things to correct today:

- Angle your brush at 45 degrees toward the gumline – not flat against the teeth. This is where plaque builds up first.
- Use gentle, circular motions rather than back-and-forth scrubbing. Aggressive horizontal brushing wears down enamel and recedes gums over time.
- Do not forget the inner surfaces of the front teeth, the tongue, and the chewing surfaces; areas that are consistently under-brushed.

Ask us at your next appointment and we will walk you through a personalized brushing technique review.

SPOTLIGHT: THE ENVY SMILE EXPERIENCE

More Than a Dental Visit

At Envy Smile Dental Spa, we believe dental care should feel like self-care. Every appointment includes our signature comfort touches; warm towels, aromatherapy, paraffin hand treatment, and a care team that takes the time to listen to your concerns before, during, and after your procedure.

Whether you are coming in for a routine cleaning or a complex treatment plan, our goal is the same: you leave feeling better than when you arrived – in every sense.

Spring is here. Your smile is ready.
